WORK EXPERIENCE

Software Engineer Lead | AI Data Engineer | Capgemini North America

Feb 2020 – Present

Client: CVS Health, Rhode Island

- Designed and developed Azure cloud-based Solution Architecture for Script Profitability project
- Developed an efficient and quality DataBricks PySpark pipeline for network matching engine
- Built a **utility to read ORC data** that can be used across the platform
- Optimized the DataBricks job scheduling and cluster resource utilization
- Hosted locally integrated network matching framework for a quick feel of the product to the Business Analyst
- Implemented agile development using Rally for better project deliverables

Client: Viacom CBS, New York

- Developed Airflow ETL data pipelines on GCP cloud composer
- Optimized data pipelines with efficient airflow operators
- Migrated on-premise airflow workload to integrate it with GCP Cloud composer
- Implemented SQL Optimization for GCP big query datasets and further downstream systems

Machine Learning Engineer | AI Software Development | AI Foundry, Wakefield, MA

Jan 2019 – Aug 2019

- Designed and developed deep vision models for document image classification
- Implemented **10x faster and reliable computer vision solution** for the image processing
- Automated keyword image data collection for classification model with the semi-supervised solution
- Developed a lightweight core software algorithm in Python for document key-value extraction and association
- **Represented development team in POC** with clients and sales team
- Contributed to product testing utility for quality improvement and better delivery
- Proactive discussion with SMEs for the process improvements and automation scope

Senior Systems Engineer | Business Intelligence - MicroStrategy | Infosys Limited, India

Jul 2014 – May 2017

Client: American Express, AZ, USA

- Developed multiple interactive dashboards and reports in MicroStrategy for **Enterprise data analysis**
- Managed project lifecycle for MicroStrategy BI architecture with ITIL framework
- Implemented ETL workflows for data integration from the various data source to Datawarehouse using Talend and SSIS
- Presented **monthly Infrastructure metrics** to clients with **proven strategic solutions** for resource optimization
- Improved report execution with **SQL optimization and process improvement** using automation
- Automated object migration using MicroStrategy tools and VB Script resulted in **saving 1000+ hours** and related cost with **improved customer satisfaction**
- Conducted Bi-yearly data analysis for **User Access Certification Audit, License optimization**

EDUCATION

Northeastern University, Boston, MA. | MS in Information Systems | Graduation: Dec 2019 | GPA: 3.53

Major Courses: Artificial Intelligence, Advanced Data Science, Business Intelligence & Data warehousing, Engineering of Big Data Systems, Cloud Computing and Containerizations, and Application Engineering & Development

CERTIFICATIONS:

- **Databricks Certified Associate Developer for Apache Spark 3.0**

TECHNICAL SKILLS

- Cloud Platforms: **Microsoft Azure, Google Cloud Platform, Amazon Web Services**
- Programming Languages: **Python, Java, SQL**
- Data Science Packages: **CV, NumPy, Pandas, Scikit-Learn, Matplotlib, NLTK, TPOT, H2O, Keras**
- Business Intelligence Tools: **Tableau, Power BI, MicroStrategy**
- Databases Systems: **Redshift, MySQL, MSSQL, Big Query, MongoDB**
- Big Data Technologies: **Hadoop, Spark, Big Query, HBase, Hive, Pig**
- Software Development Methodologies: **Agile, Waterfall, ITIL**
- CICD technologies: **Docker, Kubernetes, Ansible, Jenkins, Circle-CI, GitHub**
